

XREV Racing Formular 5W-40

For drivers whose cars have already clocked more than 75,000km and light pressure turbo-charged cars, the Xrev Racing Formula 5W-40 has been carefully formulated just for your car. This is the standard rating for cars operating in Singapore for optimal protection of the engine, significantly reducing friction, enhancing free-revving smoothness, delivering maximum torque and at the same time reducing fuel consumption.

Driver's Comments:

After switching to **XREV Racing Formula 5W-40**, I noticed my oil temperature never exceeded 80 Degrees Celsius even under hard driving (when previously it was between 85 and 90). My oil pressure also remained at a constant 30-70 PSI. Overall, my car has definitely much more torque and punch than before, plus it is also incredibly quieter and smoother even after I've clocked 4,000km. Three thumbs up for **XREV!**
- Ben Gan (VW GOLF GTI)
